Stoves from Natural Earth Products Ltd

We are proud to be official stockists of Clear-view Stoves which are made in the UK and are, in the view of many, the most efficient and classic stoves available in the UK.

There is nothing quite like the warmth and comfort of a real fire and with the large glass windows of a Clearview, the fire is more easily viewed. Unlike many other stoves, the Clearview airwash system means a clear view of the fire without sooting or tarring for much longer.

Our HETAS registered engineer also provides a full lining and installation service.
